Case Study for Researchers

Complete Patenting Solution

The Client:

A US-based researcher, working in the domain of Robotics

The Case:

Client had an idea about a new device for use in manufacturing industry and he wanted Sagacious to perform a patentability search and assist him in the future course of action.

The Project:

Sagacious team brainstormed with the client to identify the potentially novel aspects of the proposed device based on clients domain knowledge. Sagacious then conducted comprehensive patentability studies for these aspects and presented the results of the study to the client. The results helped the client select three aspects worth patenting. Thereafter, Sagacious assisted the client in the following way:

- ❑ Preparing the patent strategy: Sagacious presented various patenting routes and options to the client as per his requirements, and explained him the nitty-gritty's of patenting process.
- ❑ Drafting the patent applications: Sagacious drafted three patent applications comprehensively covering all the unique aspects to be filed with the USPTO. Sagacious also customized the drafts to meet the requirement for filing with the EPO.
- ❑ Filing the patent applications with USPTO and EPO: Sagacious leveraged its international collaborations to file the patent applications with the USPTO and EPO cost effectively.
- ❑ Prosecution of patent application: Sagacious is currently providing prosecution support services to the client with the help of its international collaborators, wherever required.

Advantages:

Sagacious charges were as follows:

Patentability: \$ 400/ Search

Strategy Formulation: No additional charges

Drafting: \$ 3,200/ Application

Filing: Attorney fees on 'As-Is' basis

Prosecution: Charged hourly (+ Attorney charges, wherever applicable)

The above charges provide at least **50% cost savings** to the client w.r.t. getting the same tasks done in the US.

Sagacious also acted as a convenient single-point contact for all his international filing and prosecution
